

Crimson allows you to automatically suppress flags for records you do not want to include in a list pull, such as **Thank You's**, **Money Search**, **Best Efforts**, or **People Search** lists. Below are the steps to add suppression flags to your search criteria.

Setting Up Channel Suppression Flags

1. From the **Main Menu**, go to **Settings > People > Flag** tab.
2. **Add** a new flag or click on the  button of the flag you want to have suppressed.
3. Check the box next to **“This is a Channel Suppression Flag”**
 - You can also check one or more of the Target **Channels** to be suppressed. (For more information on this setting, see [Crimson: People Search - Advanced Export by Channel](#)).
4. **Save** your changes.

Applying Channel Suppression Flags

To apply, click on the toggle switch under **“Apply Channel Suppression Flags”** in **People Search**, **Money Search**, **Best Efforts**, and **Thank You** searches' Suppression filter group area. The search will then suppress records with those flags set up in its setting.
