

The **People Search Results** can be further analyzed using the results **Aggregation** tool in Crimson.

### How to use the Aggregation Tool

1. Enter your [People Search](#) filter criteria and click .
2. Your results will appear on the **Results** tab.
3. Click the **Aggregation** tab to further analyze.
4. By default, the results will aggregate the total number of people records based on your search.

|       | Total       | # Gifts |
|-------|-------------|---------|
| Total | \$2,227,639 | 335     |

5. Click in the **Group By** field to select further aggregation criteria. Filter field options include:
  - People Type
  - State
6. Select the field you would like to aggregate by to see results. You can select multiple.
7. Results will appear onscreen.
  - Click while in the **Aggregation** tab to export your aggregation results. Go back to the **Results** tab to export your full list of records.

People Search ?

Filters Output Fields Result Aggregation

Group By: People Type  Then By:

|             | # Records |
|-------------|-----------|
| Individual  | 2,028     |
| Other       | 3         |
| Partnership | 1         |
